

We want to get and keep your business. That means that we will do anything we can to make you another one of our happy customers.

My name is Michael Natula. I am the founder and president of MemoryMasters and the developer of the Primus line of personal computers. Could I have a

discover is that the state of the art has progressed so far that these machines have become nearly generic equivalents of each other. They all use basically the same components in virtually the same configurations.

Primus computers are no different in that respect. What we're really saying is that we're

# Tell us what you want.

few moments of your time to speak to you on behalf of myself and my wonderful staff of friendly, knowledgeable associates here at MemoryMasters?

We want to be your computer company. Let us show you how far we will go for you to prove that your complete satisfaction is our highest priority. We truly recognize that without you, we would not be here, working to create win-win solutions. We know that we really only win if you win too.

## NO HARDWARE HYPE

Let's be honest. Look under the cover of virtually any 286™, 386™ or 486™ based system you can find advertised on the pages of this or any other magazine. What you will

### THE MINI TOWER CASE

An elegant solution for systems requiring moderate expandability with minimum desk space.

A typical **20MHz 386sx** VGA color system complete with keyboard, 2MB RAM, 1.2MB floppy and 40MB 28ms hard drive, multi I/O card, 16 bit 256k VGA card and 14" monitor in a similarly styled case sells for **\$1899**.

A similarly equipped **12MHz 286** 12" monochrome system with 1MB RAM in the stylish baby case (below left) sells for **\$1149**.

not going to bombard you with hardware hype or claims of having the best or fastest or most powerful computers available. We do carefully select the best components we can obtain to produce the fastest, most reliable machines possible. We negotiate pricing aggressively to insure the lowest possible costs for you.

Finally, we painstakingly test each system to insure long, trouble-free life. We can promise that we will deliver a system that is at least as good as any other system you can find.

We'll also promise to do it right and to get it there cheaper, faster

### THE TOWER CASE

Perfect for situations requiring maximum expandability in a floor standing system.

An ultimate **486 Cache Hi-Res** color tower case system including keyboard, 4MB RAM, 64k Cache, 1.2MB floppy drive, 320MB 15ms ESDI hard drive, I/O card, 16 bit 512k VGA card and 1024 x 768 monitor sells for **\$6999**.

and better supported than anyone else. Tell us what you want. We'll go to bat for you.

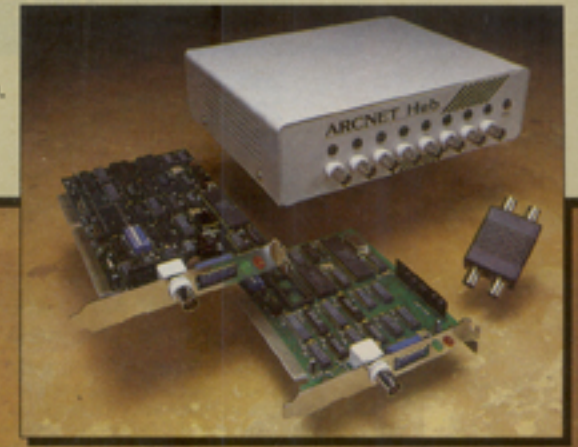

## QUICK RESPONSE
